

Stubbo Solar

Renewable Energy from ACEN

April 2024 Update

ACEN Australia brings large scale renewable energy projects to life. Through our solar, wind and energy storage projects, our projects are producing clean electricity for Australian homes and businesses.

The Stubbo Solar project is currently in construction and will generate enough renewable energy to power 185,000 average Australian homes per year and contribute to NSW's target of 50% renewable energy by 2030.

250,000

solar panels installed to date
(930,000 upon completion)

We engaged proud Mowgee / Wiradjuri man Rick Slaven to create us artwork for our Stubbo Solar project. The piece is called Future Endeavours, and this is his story.

Future Endeavours is the journey of a new future of renewable energy growing on Wiradjuri country using the power of the sun to turn into energy to allow us to grow and thrive alongside mother earth.

The centre of the piece shows the elements of the sun surrounded by stars throwing out its rays of light for life to thrive. The red flashes throughout are the reminder of the suns journey. The bottom right corner I have shown the mountains which have been part of our song lines for safe passage all over Wiradjuri country plus giving us water run off to fill our rivers and swamps to give us a continuous cycle of essential requirement for life.

The bottom left I have represented agriculture showing the crops, of grain cotton and wool all relying on power now and in the future.

The bottom middle I have symbolised the Stubbo Solar farm sitting in the new landscape of Wiradjuri country catching and storing the power of the sun. The patterns inside the panels represents the story and journey forward as this is the beginning of a new united journey for us all.

Rick Slaven - Contemporary Wiradjuri Artist

Sharing in the benefits

We understand the importance of sharing in the benefits that our project can provide.

Under our Stubbo Solar Social Investment Program (SIP), we have supported not for profit organisations and events in Gulgong and surrounds.

For more information on how we can support your not-for-profit organisation, visit our website to read our SIP Guidelines and to download a copy of our SIP application form.

Applications are always open

If you are interested in working on our project please contact STSPCommunity@pcl.com
