

A huge milestone was reached on site by our subcontractors, EPEC Group with the transport and lift of one of the biggest modular combination switch room and control rooms seen on a renewable connection to date.

Measuring in at a whopping 32 meters long and weighing 65 tonnes, the experienced team ensured this critical equipment was installed safely and carefully, in preparation for site connection, testing and commissioning.

Under our Stubbo Solar Social Investment Program, we've been pleased to partner with the Gulgong Men's Shed providing much needed equipment and new tools.

We encourage you to visit the Gulgong Men's Shed at one of their Open Days, held on the second Saturday of each month at 22 Holterman street, Gulgong.

The Men's Shed movement has become one of the most powerful tools in addressing health and wellbeing, helping men to once again become valued and productive members of our community.

We are proud to again be major sponsor of the Gulgong Prince of Wales Eisteddfod and wish competitors every success this year.
