

Stubbo Solar

Renewable Energy from ACEN

March 2025

ACEN Australia is committed to the Central-West Orana region for decades to come.

We believe the region has many opportunities for renewable energy to be developed in a way that optimises land use for the dual purpose of energy and agricultural production.

Our Stubbo Solar project has been in construction since late 2022, and is nearing completion.

We are in what is referred to as the commissioning stage of the project. This is a crucial step in the project and is part of the process of ensuring that equipment is correctly installed and operates as intended.

The project has received Generator Registration and is currently exporting to the National Electricity Market (NEM).

Earlier in the year, Stubbo Solar successfully exported 100MW of renewable energy to the NEM.

Stubbo Solar is a 400-megawatt (MW) large scale solar project being constructed by our contracting partner PCL Construction.

ACEN Australia's Stubbo Solar Social Investment Program (SIP) is our voluntary contribution to Gulgong and surrounding communities.

Totalling \$200,000 throughout the construction period, funding is available to not-for profit organisations and activities that directly benefit and enhance the liveability and vibrancy of our local community.

We are a proud major sponsor of the Gulgong Show and we're thrilled to officially open the Show this year.
