

# Stubbo Solar

Renewable Energy from ACEN

October 2025

## Investing in our community

### GULGONG SHOWGROUND SOLAR PROJECT

At ACEN Australia, we bring large-scale renewable energy projects to life. Through our solar, wind, and energy storage developments, we're helping power Australian homes and businesses with clean, sustainable electricity.

As construction nears completion on our Stubbo Solar project, we're proud to continue supporting the local not-for-profit organisations that play a vital role in our community.

Through the **Stubbo Solar Social Investment Program**, ACEN Australia has provided funding for the installation of solar panels at the **Gulgong Showground**—part of our ongoing commitment to the Gulgong community and environmental sustainability.

This initiative will help reduce energy costs for the showground and the many community groups and campers, that use the facilities, while also contributing to a cleaner, greener future through renewable energy.

We remain committed to supporting projects that deliver lasting benefits for both the environment and the communities where we live, work, and operate.

## PINK UP MUDGEE

Join us as we shine pink each October during Breast Cancer Awareness month and help raise funds for the McGrath Foundation who place care nurses in communities throughout Australia.

**DONATE** ❤️

BlackLab Solar installed a 23kW, 3 phase solar system, consisting of 52 Trina solar panels and 52 Enphase micro inverters. The Enphase micro inverters are one of the safest and most reliable technology available. This system will be monitored via the Enlighten app and is connected to one of the switchboards at the Showground.

The system will provide daytime electricity for the entire installation via its network of overhead lines that feed numerous switchboards that provide power to caravan sites and other out buildings.

**BlackLab Solar is a locally owned, family company. Call Paul on 0423 361 963 to discuss customised solar solutions for your home or property.**
